Prof. Bowling on Cholera. The following remarks of Dr. Bowling, of Nashvillo, Tenn., a practitioner of a third of a century, and one of the meet enlightened medical men of the country, will command attention :

We have battled with every epidemie cholera, from the first to the last day, in our region of operation, which has visited this country, and we affirm, without the fear of successful contradiction, the following truths of this postileace which walketh in darkness, and destruction which wasteth at noonday.

### Folly in Finnerals.

They put him in a show case! was the remark made by one, who, sometime sluce attended a fashlonable fuueral. And it was true, for modern funerals are certainly more like mere estentations shows than the solemn consigning of the remains of a human being to their last resting place. The pempons displays which those who make them would have the world believe are tributes of affection to the deceased, are nothing more or less than efforts at notoriety-attempts to eclipse in magnificence and show the obsequies of some fushionable's loved departed. Getting married and being burled have become matters of serious Import; that is if the newly wedded and the friends of the dead desire to be coasidered anybody. The old-fashioned methods of entering upon the joys of married life, and the old time ways of burying the dead, have all departed ex- Cardwell. cept with a few common people.
